

# Is Your Facility Prepared for the Data Challenges of Today's Healthcare?

## The Data Struggle in Healthcare

The medical industry has struggled with providing a comprehensive aggregated set of data that will allow facilities to make strategic market-based decisions regarding patient safety, satisfaction and the elevation of medicine.

## Medical facilities rely on data to:

- Improve procedures and patient outcomes
- Remain competitive
- Analyze levels of supply usage and waste
- Complete submissions for state licensing and CMS Accreditation

## A Comprehensive Approach

Nebula Data Intel, LLC (NDI), uniquely combines multiple data streams to identify trends, drive informed decision making, and improve patient safety through data intelligence.

## Creating Meaningful Data Intelligence

As patient safety is always the top concern for medical facilities, the key to successful data collection is minimal disruption in current processes. NDI has created a non-intrusive patent pending collection procedure for surgery centers using customized bar-coded scanning technology. This real-time data process will capture:

- Demographic
- Supply usage
- Supply purchases
- Patient satisfaction
- Facility performance
- Pharma usage
- Insurance coverage
- Outcome data

Encrypted, de-identified data then flows to the cloud where analytical reports and data will be available in an easy-to-use dashboard.

Easy access to & update preference cards

Optimize facility costs and med/surge spend

Track patient outcome trends in real time

Early adopter benefits

## Gathered Through a Simple, Non-Intrusive Process

Meaningful data intelligence involves understanding the sales, usage and outcome data of your facility. This combination of data is the core of Nebula Data Intel. Data is gathered in just seconds, encrypted and then available on your dashboard.

Identifying data is encrypted, personal information is stripped and converted to hashes and random numbers at point of collection.

“Nebula Data Intel provides medical intelligence that can be utilized throughout the healthcare industry. It’s an exciting program that focuses on improving patient safety through data intelligence.”

— Dr. David Watts, President, AAAASF’s Board of Directors and CEO, Nebula Data Intel LLC.

## NDI’s patent-pending technology offers all these benefits:

- Save time using non-disruptive technology
- Maintain or improve overall quality
- Collect facility data for submission to ASC State Licensing and CMS Accreditation
- Increase patient satisfaction

- Patients’ data is secure, de-identified and HIPAA compliant.
- More efficient and streamlined facility operations
- Increased knowledge of surgical trends and key medical insights

- Zero cost to participate; open to any accredited outpatient surgical center
- Positive impact on your revenue
- Estimated savings for centers streamlining this process using NDI: \$7,000-\$10,000.
- Drive faster reimbursements through new revenue streams

## Why Nebula Data Intel is the Right Choice

Through partnerships with Harvard University and AAAASF, NDI has the qualifications and experience to help you manage your data.

# Ready to Get Started and Get Results?

## Sign-up Your Facility Today!

Participation is EASY:

1. Register

2. Receive your free iPad

3. Nebula provides training, a dedicated specialist & ongoing support

4. Collect your data by scanning a barcode or clicking a button

5. Submit your data
